R200-A
## Automatic Hoist

FEATURES

- The automatic hoist is designed with unique concepts, suitable for very space-limited mid-& small sized studio.

- The lifting machine is located at the barrel, goes up & down with the barrel which does require equipment level.

- Lifting height range is 4-12m selectable, lifting speed at 0.5-8m/min. horizontal speed at about 1.5m/min.

- Barrel length is 2-4m selectable.

- Barrel can be configured with direct connection or dimming power socket, DMX512 socket, network socket, audiovisual socket etc., can hang up common studio/cinema lights, computerised lights, LED screen, projector etc.

- Protections of top and bottom travel limits, loosen & broken cable protection, protection of roof top upward movement.

- Maximum loading 200Kg.

- Customisable non electrical horizontal movement machine
